About

I'm a second-year B.Tech student in Computer Science and Business Systems at Rajalakshmi Engineering College with a growing interest in software development. I have a basic understanding of Python and C, and I'm currently building my programming and problem-solving skills through coursework and small projects. I'm eager to learn more about real-world tech, especially in areas like AI and software engineering, and I'm actively looking for opportunities to grow and apply what I'm learning.

Education

Rajalakshmi Engineering College, Chennai, TamilNadu,

India B.Tech in Computer Science and Business Systems

(CSBS) Expected Graduation: 2027

CGPA: 8.34

Sunbeam Matriculation School, Vellore, TamilNadu, India

12th Grade - Tamil Nadu State Board

Cut-off: 184 / 200 Total: 539 / 600 Year: 2024

10th Grade - Tamil Nadu State Board

Total: 448 / 500 Year: 2022

Skills & Competencies

- **Languages:** Python (Basic), C (Beginner)
- **Tools:** VS Code, Jupyter Notebook, Excel
- **Core Concepts:** Problem Solving, Control Structures, Logic Building
- **Soft Skills:** Communication, Collaboration, Continuous Learning

Certifications

- Microsoft Azure AI Fundamentals - Microsoft
 - UX Design Virtual Internship - Forage, Lloyds Banking Group
 - Python (Basic) Certificate - HackerRank
-

Achievements

- Winner – Smart India Hackathon (SIH) Internal Round
- Participated in multiple hackathons, developing real-world solutions under time constraints.
- 4+ hackathon finalist.

projects

1. Vucan Gym – Frontend Gym Management Web Application

- Developed and deployed a responsive fitness website using HTML, CSS, and JavaScript.
 - Designed user-friendly UI for showcasing services, memberships, and schedules.
 - Focused on performance and accessibility using modern web practices.
- Live: <https://vucan-gym.vercel.app>

2. MarketMate – AI Marketing Assistant for Small Businesses

- Developed an AI-powered web application that provides marketing guidance for small businesses
 - Designed an interactive chat-based interface to assist users with business growth strategies
 - Focused on solving real-world challenges for low-budget businesses using AI-driven suggestions
 - Built and deployed using modern web technologies
- Live: <https://marketmate-alpha.vercel.app>

3. Full-Stack ML Healthcare Application for Skin Analysis

- Built an AI-based acne severity classification system using EfficientNetB0 and TensorFlow.
- Developed an OpenCV preprocessing pipeline with face detection and image enhancement techniques.
- Created a real-time Flask web app supporting image upload and live webcam acne detection.
- Integrated GPT-powered skincare recommendation generation using the OpenRouter API.
- Designed an SQLite database system to track scan history, predictions, and severity metrics.

Interests

- Artificial Intelligence
 - IoT & Networking
 - Building real-world applications
-
